

Full Year 2013 Results Highlight

- ✓ LDR was lowered significantly over the past 6 months from 105.4% to at 95.1%, backed by total funding that booked 21% increase to Rp 140 trillion, including robust CASA growth of 23% to Rp 53 trillion.
- ✓ CASA to total customers' deposits was 48% per December 2013 from 26% in 2008.
- ✓ CoC and NPL have been manageable at 2.6 and 1.9% (2012: 2.8% and 2.3%, respectively). NIM was 9.6% from 10.0% a year earlier due to rise in cost of fund and shift in asset mix.
- ✓ Total outstanding loans grew 16% reaching Rp 135 trillion.
- ✓ Trade finance grew at 45% (cash loans) and 76% (non cash loans).
- ✓ Non-mass market loans grew strongly at 30% to Rp 65 trillion.
- ✓ NPAT reached Rp 4,042 billion, driven by 5% rise in net interest income and 11% increment of fee income.
- ✓ Strong capital with Tier 1 capital ratio of 17.3% and CAR of 17.9%.

2013 Financial Results

Despite the macro economic challenges in 2013, especially in the second semester, Danamon continued to book a NPAT of Rp 4,042 billion from Rp 4,012 billion a year earlier. This result came from both net interest income (NII) that increased 5% to Rp 13,531 billion as well as from the fee-based income that increased 11% to Rp 4,929 billion.

LDR was significantly lowered to 95.1% from 105.4% in 1H13

The balance sheet of the system has been indicating tightened liquidity as the interest rate was steadily in rising trend during the second half of the year. The sector's LDR reached 90.0% as of November 2013 against 83.6% in November 2012; resulting tougher competition in funding.

Despite of the tightening liquidity in the system and a healthy increase in loans, BDI managed to lower its LDR by increasing deposits growth at the higher rate than the loan growth. Deposits grew strongly at 21% to Rp 110,807 billion, with CASA's grew robustly at 23%, leading to a slight improve in CASA ratio to 48% from 47% last year. The LDR stood at 95.1% against 100.5% in the previous year, or an improvement of 540 bps.

Continue the use of long term funding in Adira Finance

The Bank also use borrowings and long term funding mainly to fund Adira Finance business where the duration will match nicely and priced at fixed rate. The use of bank borrowings and long-term funding increased 20% to Rp 29,025 billion in December 2013. By the end 2013, loan to funding was 87.4% against 89.5% last year.

The outlook of industry's margin remains challenging as funding cost competition inevitably intensifies. Compared to the previous year, Danamon's NIM has been reduced to 9.6%. The Bank's earning asset yield (blended) dropped slightly to 14.3% from 14.8% a year earlier due to change in asset mix and lower yield. IDR loan yield was down 0.3% to 15.7%, in parallel with decrease in other earning assets yield such as Fasbi and Corporate bonds. CoF increased from 5.1% to 5.2%, mainly resulted from a steep increase in the last quarter of 2013 that rose from 5.2% in 3Q13 to 5.7% 4Q13.

Continuous Effort to build CASA

Danamon built CASA particularly through four champion products that have been well accepted by the market. As at 31 December 2013, total CA amounted Rp 21.1 trillion growing nicely at CAGR 24% over the last 5 years. While SA amounted Rp 32.1 trillion growing at CAGR 20% over the same period.

Various initiatives surrounding product and service which contribute to this achievement include cross selling strategy, new Bancassurance & CASA products, speed up process, reduce queuing time and centralised complaint handling system. Other initiatives related to people and infrastructure include increasing sales capacity, leveraging branches to provide full service, rolling out mobile application & branchless banking, revamping existing branches to improve customer experience, as well as introduction of 15 new privilege centers and 8 new mobile branches.

Assets Quality Unaffected amid Challenge in Macro Economic Environment

Asset quality has been well managed with NPL stood at 1.9% from 2.4% last year.

BDI monitored its loans from various aspects, including based on segments and based on customers' industry. NPL monitoring by customer's industry enable us to better understand our customers' profile. As per 31 December 2013, the highest NPL came from the mining sector

PT Bank Danamon Indonesia, Tbk
Investor Newsletter – Full Year 2013 Results
February 2014

at 8% with the loan exposure of only 2% of total loan, derived from only 2 customers (one corporate and one SME customer).

We also have managed the NPL on each segment we serve:

(%)	2012	2013	Y-y
Mass Market	2.6	2.6	-
Retail	1.5	1.3	-0.2
Mid Size	1.5	0.9	-0.5
Wholesale	3.3	1.0	-2.3
Total	2.2	1.9	-0.3

%

Healthy Loan Growth

Loans climbed 16% to Rp 135,383 billion against last year's Rp 116,385 billion. Impact from Government regulation on auto down-payment still hampered the overall loan growth, as indicated by loans excluding automotive financing rose 23% compared to a year ago.

In line with the Indonesia demographic shift where people belong to middle and affluent class (as opposed to poor and aspirant class) will increase both in term number as well as proportion, BDI will continuously foster its presence across all economic spectrum.

Business diversification effort was initiated in 2010 where BDI started to focus promoting SME segment. As a result, over the last three years, SME segment had grown at CAGR 23%, while NPL stable at 1.4%.

Commercial segment recorded a healthy growth at CAGR of 26% over the last three years to Rp 16.6 trillion by end of 2013. NPL on this segment was as low as 0.3%.

Similarly, corporate segment recorded CAGR of 21% over the past 3 years to Rp 18.8 trillion. NPL was at 1.1%

February 2014

Last year, ADMF recorded a modest growth of 6%, where 2W auto financing experiences flat growth and 4W auto financing grew at 17%. The impact mainly came in the first semester of 2013 where ADMF its market share to its competitors who provided syariah financing. However, ADMF gained back some of its market share on the second half 2013 when syariah financing also subject to down payment ruling.

By year end, market share for 2W and 4W stood at 12.6% and 5.4%, respectively. We anticipate that this year ADMF will grow about 10% to 12% and gain back its market share at 15% to 16% level.

Micro loan grew at 6% to Rp 19,865 billion, remain a challenge for BDI particularly in Jawa. Management continue to focus on resolving this issue through network and capacity optimisation, further people management, tapping new upper tier micro segment and exploring new business opportunity.

Trade finance is getting more important

Trade finance has shown a robust growth over the last three years. Cash loan booked a 43% CAGR while non-cash loan booked a 34% CAGR. Corporate and commercial segments had become the growth driver with 48% yoy to Rp 4.3 trillion and 40% yoy to Rp 5.1 trillion respectively.

The Bank's investment helps to provide the best people and infrastructure to serve the customers. Danamon has invested in New Trade Finance System (NTFS) to add more customer touch points. Twenty five trade specialists and Centralised Trade Operation enabled the Bank to process and serve efficiently. The Bank has also built Trade Service Point at Port (TSPP) in Jakarta, Medan, and Surabaya for Import Tax Payment and B/L endorsement, as well as established trade representatives in 14 big cities in Java, Sumatra, Kalimantan, and Sulawesi.

February 2014

Remain strong capital structure

Strong capital structure allows the Bank to better position itself amid the challenging macro economic situation and more complex regulation (e.g. Basel requirement for capital buffer). Without being complacent, the Bank's capital level was amongst the highest in the system with consolidated CAR of 17.9%, though there has been a slight decrease compared to 18.9% a year ago. The stand alone CAR was 17.5% against 18.4% last year.

Most of Bank's capital is in form of Tier 1 Capital.

Slight increase in the NPAT

Danamon's net interest income reached Rp 13,531 billion from last year's Rp 12,922 billion, on the back of 10% rise in earning assets to Rp 138,136 billion from Rp 125,171 billion per 31 December 2012.

BDI limited ability to re-price its loan, especially for non mass market loan where the rates are usually fixed, toppled with increasing costs of funds which are more sensitive toward changes in benchmark rates, led to a declining trend on NIM during 2013.

Fee income grew well and came at 27% of operating income or Rp 4,929 billion, rose 11% from last year. The growth occurred quite balance both in credit related fees as well as in the non-credit related one. The 6% increase in operating income rose to Rp 18,460 billion was netted off by 7% increase in cost of credit and 10% increase in operating expense to Rp 3,184 billion and Rp 9,695 billion, respectively. Thus cost to income ratio stood at 52.5% compared to 50.8% a year ago.

The cost of credit grew modestly at 7% despite 16% loan growth, as prudent risk management is paramount. Total allowances for possible losses on loans were Rp 3,226 billion compared to Rp 3,049 billion last year. Overall, cost of credit over average earning assets stood at 2.6% versus 2.8% last year. Significant improvement in the cost of credit occurred in the last quarter where the CoC stood at 2.3% from 2.7% in 3Q13.

February 2014

Opex Turnover(%)

Currently the Bank operates at the 52.5% cost to income ratio and 6.0% operating expense turnover. Management acknowledged this issue and currently in the process of reviewing new operating model to target operating expense turnover ratio and cost to income ratio at less than 5% and 50 % respectively in the medium term.

By the end of 2013, NPAT reached Rp 4,042 billion with ROAA and ROAE at 2.5% and 14.5%, respectively.

Cost to Income Ratio (%)

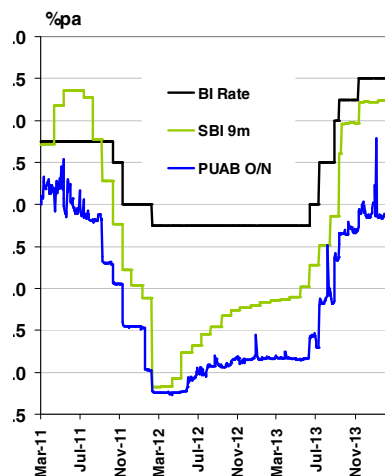

Macro Economy

The overall year 2013 macro economic situation was not very encouraging

In 2013, the tight monetary policy affects the economic growth to slow down to the level 5.78%yoy (from 6.2%yoy, the previous year). The slowdown was most apparent in the lower pace of investment growth, while consumption remained strong. This year, we expect the economy to grow relatively steady, and could grow by 5.73% yoy as impact of the interest rate hike will materialize, but may be cushioned by support from election spending.

The inflation pressure in 2013 was also higher due to the volatile food prices and some administered price policy (i.e. electricity rate hike, subsidized fuel price hike). The high inflation (8.38%, YE) coupled with the heightening pressure in the financial market forced the central bank to raise the benchmark rate by 175bps (to 7.5%, YE) in 2013.

We might Face Similar Macro Economy Situation in 2014

Inflation will be lower in 2014 as the last year's fuel price hike impact will have normalized. Pressure on inflation may be more on the volatile food prices due to the floods disaster and also the possibility of the electricity rate hike.

Central Bank's main focus is on the financial stability, thus rate hike possibility is still there, as we think market will still be volatile in the first half of 2014 due to the uncertainty in the global market. We expect another 25 bps in the policy rate this year to 7.75%.

Regulation

On 12 December 2013, the Indonesian Central Bank issued regulation No. 15/12/PBI 2013 on Capital Adequacy with objective: to increase the quantity and quality of banks' capital. Prepared based on the Basel III Standard, the new regulation introduced buffer capital that should be built:

CAR Type	2013	2014	2015	2016	2017	2018	2019
Total minimum CAR still based on Risk Profile Risk Rating: <ul style="list-style-type: none"> Rating 1 : CAR min 8% Rating 2 : CAR min 9-<10% Rating 3 : CAR min 10-<11% Rating 4 & 5 : CAR min 11-<14% 	No Change						
Conservation Buffer				0.625%	1.25%	1.875%	2.5%
Countercyclical Buffer				0 – 2.5%	0 – 2.5%	0 – 2.5%	0 – 2.5%
Surcharge D-SIB				1 – 2.5%	1 – 2.5%	1 – 2.5%	1 – 2.5%

Compared to Indonesian Central Bank Regulation No 14/18/PBI/ 2012, on the same subject, there are several other changes introduced by this regulation:

PBI No. 14/PBI/2012 - Existing	PBI No. 15/12/PBI/2013 - New
Level of capital	
Tier 1: min 5%	Tier 1: min 6%
	Common equity Tier 1: min 4.5%
Criteria of elements that could be included as “additional tier 1 capital”	
Call option of issued instrument could not be executed before 10 years	Call option of issued instrument could not be executed before 10 years
Issued instrument may have step-up feature	Issued instrument should have no step up feature
Additional required features that are not regulated before - Has write-down mechanism - instrument's yield should not sensitive to the credit risk - could not be bought by the issuing bank	- funding is not from the bank - has no feature that may hinder bank to increase capital
Elements considered as capital	
45% of comprehensive income from AFS as part of Tier 2	100% of comprehensive income from AFS as part of Common Equity Tier 1
45% of fixed asset revaluation as part of Tier 2	100% of fixed asset revaluation as part of Common Equity Tier 1
Specific reserve is part of Tier 1	Specific reserve is part of Tier 2
Factors that adjust the capital	
50% of current year profit to Tier 1	-
50% of investment to Tier 1 and the remaining 50% to Tier 2	100% of investment to Tier 1
-	100% of intangible asset to Tier 1
100% of deferred tax minus 50% deferred tax that impacting current year profit	100% of deferred tax
Investment in other banks that considered by other bank as capital adjusted to Tier 2	Investment in other banks that considered by other bank as capital adjusted to Common Equity Tier 1

PT Bank Danamon Indonesia, Tbk
Investor Newsletter – Full Year 2013 Results
February 2014

This regulation will become effective started from 1 January 2015, except these following clauses that has become effective since 1 January 2014:

- a. Tier 1 Capital has to be maintained at least at 6% of risk weighted asset (RWA)
- b. Common Equity Tier 1 Capital needs to be maintained at least at 4.5% of RWA
- c. Any new capital instrument issued on 1 January 2014 onwards.

While BDI is still evaluating the impact of this regulation to BDI, we do not foresee that this regulation will significantly impact BDI in the next couple of years given the current strong capital structure of BDI and the fact that BDI has minimal additional Tier 1 Capital

4. The ultimate shareholder of Asia Financial (Indonesia) Pte. Ltd. (AFI) is Temasek Holding Pte. Ltd., an investment holding company based in Singapore which is wholly owned by the Ministry of Finance of Singapore.

As at 2 April 2012, the Bank has been informed by Fullerton Financial Holding Pte. Ltd. (FFH), that it has entered into a contingent share purchase agreement with DBS Group Holdings (DBS) to sell the entire FFH interest in the share capital of AFI to DBS. Currently, AFI holds approximately 67.37% of the total issued shares of the Bank. This transaction is subject to the approvals, among others, of DBS shareholders and regulators, including Bank Indonesia.

PT Bank Danamon Indonesia, Tbk
Investor Newsletter – First Nine Months 2013 Results
February 2014

As at 3 June 2013, the Bank has been informed by FFH that DBS and FFH has mutually agree to renew the conditional share purchase agreement of the entire FFH interest in the share capital of AFI, which previously expired at 4 April 2013 and 2 June 2013 changed to 1 August 2013.

As at 31 July 2013, the Bank has been informed by FFH that the conditional share purchase agreement between FFH and DBS to purchase AFI shares will be expired after the date of August 1, 2013, and will not be renewed, and therefore the agreement is no longer valid after August 1, 2013.
